

# Why Caribbean Blue?

- The Caribbean Blue Series is a unique change from typical green fish lights.
- Even though it's blue, it still attracts the same amount of fish!
- Our Caribbean Blue systems are equipped with our brightest 250 watt bulbs.
- Enjoy the marine life in your waterway like never before!

# Before You Buy

- Our Caribbean Blue Series is best suited for crystal clear waterways. Ideal water conditions are those you might encounter in the Florida Keys or the Caribbean.
- If placed in murky water, the Caribbean Blue lights will not show the color intended.

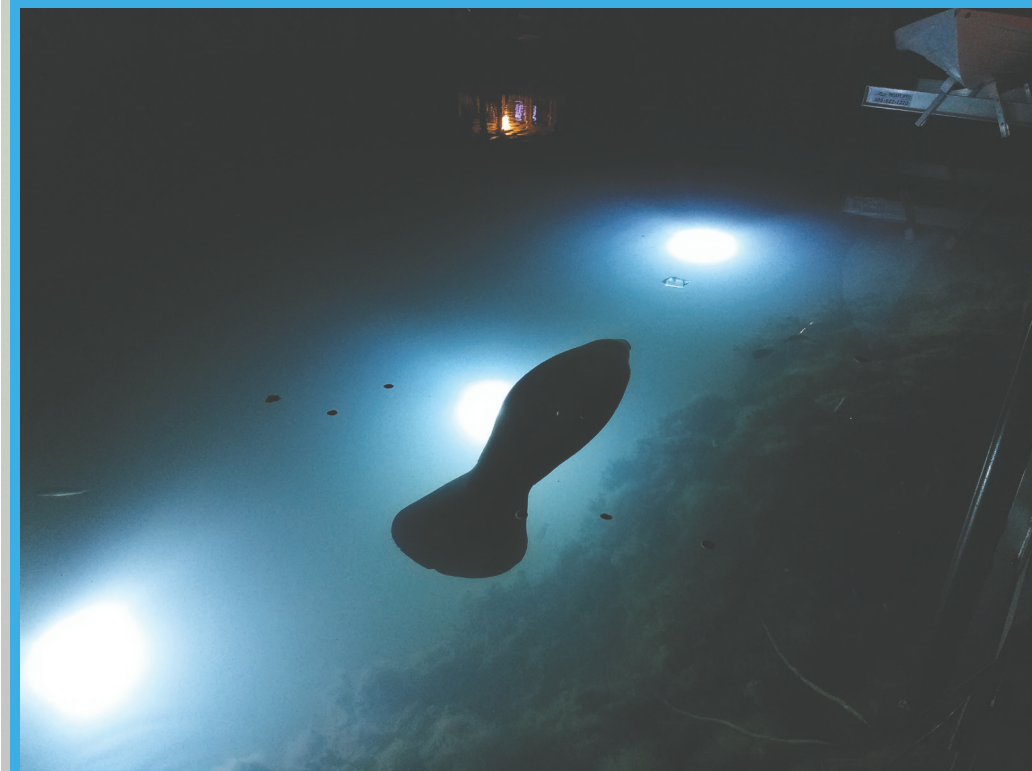

## **Warning!**

If for any reason the system should cease to function, disconnect the unit immediately as a safety precaution, then call 855-FISH-LIGHT.

**DO NOT press the reset button on the GFCI plug.**

# Extend the Life of Your System

- Your system should run continuously each night for optimal results and self-cleaning. A minimum of eight hours per night is required to keep growth off the bulb.
- The bulbs must never be illuminated out of the water. They run the risk of overheating.
- Wire shield is the best way to protect against nicks in the wire caused by fish hooks or other aquatic life. Nicks in the wire are considered damage and not covered under the three-year manufacture warranty. You can purchase wire shield through our website.

**Thank you for your purchase!**

We know you have many choices when it comes to underwater lighting, and we appreciate you choosing us!

## What's in the box?

HID Light System including connected control box, GFCI plug, and light assembly.

5lb Weight

Photocell

## Safety Disclaimer

We take every precaution to ensure that we are offering a safe and reliable product. Our lights include a built-in GFCI plug and are required to be plugged into a GFCI outlet at all times. Even with these safety features in place, we must insist that you do not swim around these lights while they are plugged in. This is true with any 110 volt lighting system. While the lights are designed and tested to shut down if there is any interruption of the power supply, the possible risk of shock/ injury/death is too great to take a chance. Please unplug the system(s) before entering the water. The manufacture/designer/seller of this product is not responsible for any injury/death/damage to property caused by the use of this product. Take any and all safety precautions when using this product. This system must be plugged into a UL approved GFCI outlet. The purchaser agrees to the above by purchasing this system. If you do not agree to these terms, please call us promptly to return your system for a full refund.
