

SYSTEM CHOICES

Our Underwater Fish Lights are perfect for anybody that lives on the water!

Single Bulb Dock Lights

Our entry level system provides everything you need to light up your waterway and attract fish!

Double Bulb Dock Lights

Double the action with two of our HID lights running on the same control box!

Triple Bulb Dock Lights

Power three of our underwater dock lights with the same control box, and a single plug.

Quad Bulb Dock Lights

Run four lights from one centralized control box and utilizing a single plug.

HOW THEY WORK

Our Underwater Fish Lights work by initially illuminating the phytoplankton and reflecting light off of the naturally occurring particles in the water. This process will start to attract your smaller baitfish such as shiners, chubs, minnows, and it won't be long before this catches the attention of your larger predatory fish. Depending on your region, you may see everything from snook, tarpon, trout, redfish, cobia, goliath grouper, manatees, bass, musky, crappie, sheepshead, stripers, rockfish, flounder, dolphin, bluegill, walleye, and many, many more on a nightly basis. Before long, you will have your own backyard aquarium which will be teeming with fish!

EASY INSTALLATION

First and foremost, an electrician is not needed to install our lights. Each system includes everything that you'll need for installation and the only things that you'll need to provide is a standard 110-volt grounded outlet and a post or piling to mount the control box. All of our Underwater Fish Light systems include an inline GFI on the plug as an added layer of safety, as well as a dusk to dawn photocell that will turn on at sunset and turn off at sunrise.

COLOR OPTIONS

Natural Green: Perfect for murky, stained, or brackish waterways as well as inland canals, lakes, and ponds. Typical lifespan is 5 to 8 years.

Vibrant Green: Works beautifully in all water types, clear, murky, or stained. Produces a rich, emerald green color. Typical lifespan is 12 to 24 months.

Caribbean Blue: Only works in crystal-clear water, similar to what you might find in The Bahamas or parts of the Florida Keys. Typical lifespan is 12 to 24 months.

PORTABLE LIGHTING

Our portable 12-volt underwater LED fishing light is designed to be taken on the go and deployed at your favorite fishing spot to bring in the fish! Unlike our permanent dock systems, our 12v drop lights can be used off your boat, kayak, local pier, or wherever the fish are biting. Works perfectly in salt water as well as fresh water! Also, our LEDs were designed to work perfectly in warm water climates just as well as in icy conditions. Available in green or white.

SOLAR LIGHTING

Whether you're looking for solar piling caps, guide lights, or subtle deck lighting, we've got you covered! All of our solar products are proudly built in the USA, using only the highest quality components to provide you with the absolute best solar dock lights on the market. Most importantly, our solar lights are maintenance free and will eliminate the need for additional outlets or wiring at your dock.

PROFESSIONAL QUALITY PROVEN TECHNOLOGY

Through testing and continuous improvements, we have developed the highest quality, most effective underwater lighting systems on the market today.

We don't just guarantee that you'll see fish, we also guarantee that you will be impressed with the build quality, beauty, and effectiveness of our lights. When you combine this with our top-notch customer service and industry-leading warranty, you can purchase from Underwater Fish Light with the utmost confidence.

Since 2008, our Underwater Fish Lights have not only been utilized by professional, commercial, and recreational fishermen all across the globe, but have also stood the test of time with regard to durability and performance.

When professionals in any field need a top-notch underwater lighting system, they call us as our lights have an undeniable reputation of flawless operation, even when subjected to harsh marine environments.

WARRANTY COVERAGE

All of our 175W and 250W Underwater Fish Light control boxes and internal components carry a three-year limited warranty which covers any level of manufacturer defect. Our 175W and 250W Natural Green bulbs carry a three-year limited warranty and our 250W Vibrant Green bulbs and Caribbean Blue bulbs carry a one-year limited warranty. Any warranty claims require that the component in question is sent to us for evaluation. The warranty does not cover damage, broken bulbs, acts of nature, theft, misuse, or any modifications to the system itself, including, but not limited to hardwiring, removal of the inline GFI plug, and the use of non-OEM components. Please note that replacement components do not extend or restart your warranty.

60-NIGHT MONEY BACK GUARANTEE

Sit back and relax as these amazing underwater lights beautifully illuminate your waterway and attract the entire aquatic food chain for your viewing or sporting pleasure! The incredible amount of marine life that you'll see will absolutely blow your mind! We promise that our Underwater Fish Light systems will provide countless hours of dockside entertainment for years to come!

We invite you to try any of our Underwater Fish Light systems for an absolutely risk-free 60-night trial! If within that time you decide that our system isn't for you, it can be returned for a full refund!*

*Our 60-Night Money Back Guarantee starts at the time of purchase. The system must be returned undamaged in working condition in order to qualify for the full refund.
